1. In response to the above-referenced requests, there is attached CIA/CRR Project No. 32.1112, The Diesel Engine Position of the Soviet Bloc, Secret/MOFORM. It is unfortunate that there has been such a delay in fulfilling your long standing request for information on the above subject, but other commitments made it impossible to complete the research required for a meaningful response before this date.

2. The enclosed draft report is being submitted in rough form on the assumption that you are increasingly anxious to have whatever information and analysis we are able to provide. The draft has not been edited or reviewed and, therefore, it does not represent finished intelligence of this Office. Nevertheless, I am advised that it does provide all the information that we have on the subject, and I can only hope that it will fulfill your major needs.
